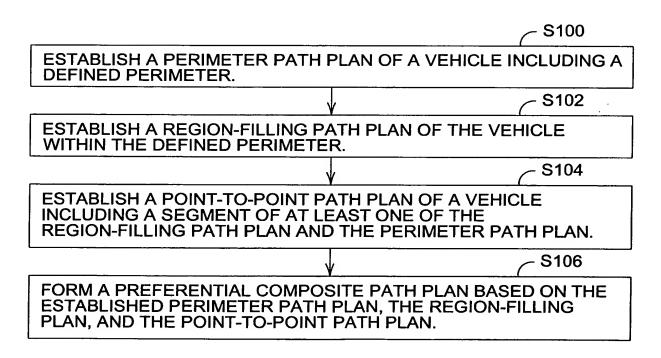

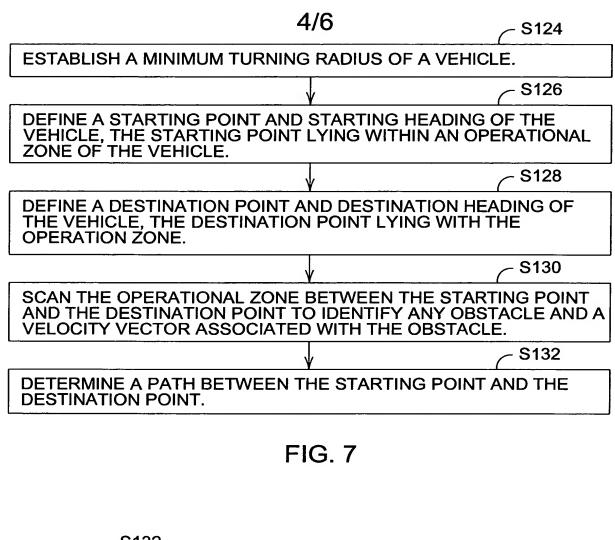

FIG. 4

TITLE: MODULAR PATH PLANNER INVENTOR: Sarah Ann Gray, et. al. DOCKET *: 16436 /deb, mah

3/6 S100 S108 DEFINE VEHICULAR CONSTRAINTS OF THE VEHICLE THAT RELATE TO NAVIGATION OF THE VEHICLE. · S110 COLLECT LOCATION DATA POINTS BY TRAVERSING A PERIMETER OF A WORK AREA TO BE COVERED BY A VEHICLE. **S112** FILTER THE COLLECTED DATA TO PROVIDE FILTERED DATA OF CRITICAL DATA POINTS TO REDUCE HIGH FREQUENCY NOISE IN THE COLLECTED DATA. - S114 SELECT A PATH FOR THE VEHICLE THAT IS COMPOSED OF SEGMENTS THAT INTERCEPT THE CRITICAL DATA POINTS. FIG. 5 S112 ✓ S116 REPRESENT RAW COLLECTED LOCATION DATA AS A VEHICLE POSITION IN A FIRST DIMENSION VERSUS TIME AND AS A VEHICLE POSITION IN A SECOND DIMENSION VERSUS TIME. THE VEHICLE POSITION IN A FIRST DIMENSION VERSUS TIME IS DESIGNATED A FIRST REPRESENTATION. THE VEHICLE POSITION IN A SECOND DIMENSION VERSUS TIME IS DESIGNATED A SECOND REPRESENTATION. S118 ACCESS RAW COLLECTED LOCATION DATA TO OBTAIN CRITICAL MAGNITUDE DATA ASSOCIATED WITH THE FIRST REPRESENTATION AND THE SECOND REPRESENTATION. **S120** APPLY FILTERING TO THE COLLECTED LOCATION DATA TO REDUCE HIGH FREQUENCY NOISE ABOVE THE EXPECTED REQUENCY RANGE OF THE COLLECTED LOCATION DATA TO ESTIMATE CURVATURE DATA (E.G., VEHICLE TRAJECTORY DATA) ASSOCIATED WITH THE FIRST REPRESENTATION AND THE SECOND REPRESENTATION. **S122** IDENTIFY CRITICAL POINTS OF A PERIMETER PATH PLAN BASED ON THE CRITICAL MAGNITUDE DATA AND THE ESTIMATED CURVATURE DATA.

TITLE: MODULAR PATH PLANNER INVENTOR: Sarah Ann Gray, et. al. DOCKET *: 16436 /deb, mah

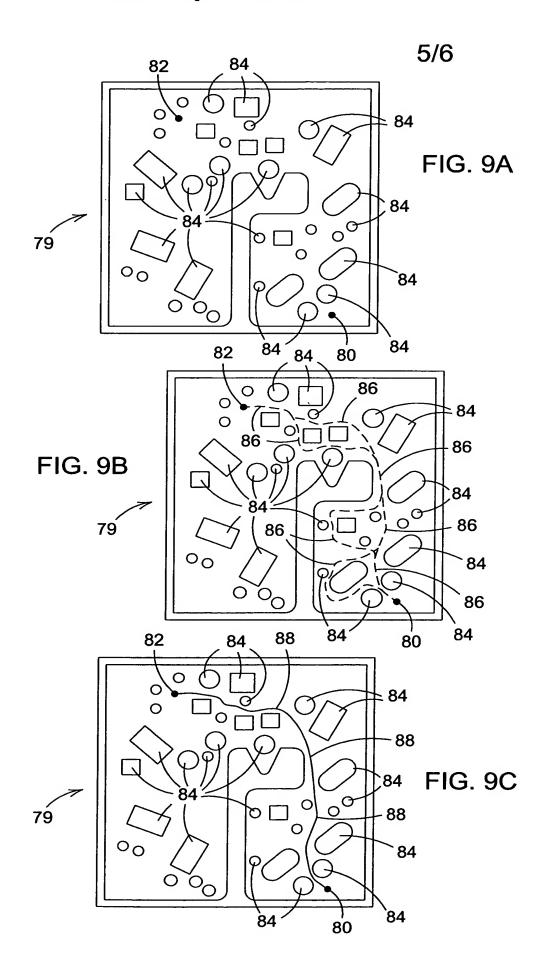

DETERMINE CANDIDATE PATHS BETWEEN AN ORIGINATION POINT AND A DESTINATION POINT.

S142

EVALUATE THE DETERMINED CANDIDATE PATHS TO ESTIMATE RESPECTIVE ECONOMIC COSTS ASSOCIATED WITH CORRESPONDING CANDIDATE PATHS.

SELECT A PREFERENTIAL POINT-TO-POINT PATH FROM AMONG THE CANDIDATE PATHS BASED ON THE EVALUATION.
